Date of birth: 2nd August 1967
Nationality: Italian

General Medical Council (UK) 4360191, Specialist Register - Cardiothoracic Surgery
Ordine dei Medici di Milano (IT) 4399

PROFESSIONAL PROFILE

A focussed, goal-oriented team-player, I have an extensive background in general thoracic surgery, with more than 2000 first operator cases to my name. My principal clinical focus has been on minimally invasive thoracic surgery, and resection in advanced disease; which is further enhanced by my academic work in thoracic oncology as demonstrated by over a hundred peer-reviewed publications. I have channelled my passion for medical education through numerous formal and informal roles, both didactic and clinical, and particularly by the adoption of innovative methodologies.

PROFESSIONAL QUALIFICATIONS

1987 - 1993 Doctor of Medicine and Surgery (University of Parma, Italy)
1994 - 1998 Postgraduate Diploma in General Surgery (University of Parma, Italy)
equivalent to the FRCS (Gen Surg) as per Council Directive 93/16/EEC of 5 April 1993
2000 - 2003 PhD in Surgical Cardio-Thoracic Pathophysiology (University of Modena, Italy)
2011 MSc in Health Administration and Management (Sacro Cuore Catholic University, Milan, Italy)
2009 - 2014 Postgraduate Diploma in Thoracic Surgery (University of Aquila, Italy)
equivalent to the FRCS (C-Th) as per Council Directive 93/16/EEC of 5 April 1993

MEMBERSHIP OF PROFESSIONAL BODIES

INTERNATIONAL European Association for Cardiothoracic Surgery (EACTS)
European Society of Thoracic Surgeons (ESTS)

MANAGEMENT EXPERIENCE

I have endeavoured to develop my leadership and management skills from very early on in my training. I have learned to set realistic targets with appropriate timescales and to manage my own workload efficiently. I also have an ability to motivate others, evidenced by the multi-source feedback and peer review survey results from my present and past posts.

In Hospital Local initiatives:

- After a survey on staplers usage among Surgical Units I was responsible for a plan for conversion of staplers supplier resulted in a more rationale practice and in a saving of approximately Euros 70.000 over one year through streamlining of supply chain and revision of usage.
- At the beginning of our VATS lobectomy programme in 2010 I successfully got funding for new minimally invasive equipment to expand the capacity of the service and to position the Unit as regional centre of excellence for minimal invasive surgery (fundraised from public and private sector 30.000 Euros to finance the development of the minimally invasive programme)
- During my experience at the National Cancer Centre INT in Milan Italy (2003-05) I was designated as the regional specialist for sarcoma and hematologic malignancies; I was responsible for management of these patients and set up a model to streamlined referrals across the hospital and supported specialist MDTs.

Regional role:

- As a member of the Italian Society for Thoracic Endoscopy (SIET) I was appointed as adviser to the Regional Health Authority (Regione Lombardia) to rationalize provision of thoracic surgery services across the region. Together with a panel of experts a list of procedures qualifying the Thoracic Surgery Units was prepared and a provisional plane for low volume Units (less than 200 procedures per year) to be merged or to be closed was the result.

National roles:

- I was the Lead for the development and introduction of a VATS National Database in May 2013 together with other 3 Italian Thoracic Surgeons; we launched the 1st Italian VATS Lobectomy Registry for collection of cases across Italy and eventually to provide an instrument to pool data for further multicentre studies. At present a total of 51 Thoracic Surgery Units joined the project (both academic and institutional hospitals, both from the public health network and private centres) and about 1,800 cases have been enrolled during the first 2 years of activity. A Scientific Board was created to refine the rules among registered centres and organize activities. An open access web site (www.vatsgroup.it) has been realized to promote interest and a comprehensive prospective database was designed to provide a simple and flexible instrument. Six different areas of interest were identified (indications and preoperative work-up, functional evaluation and QoL analysis, techniques of lymph nodes mapping, surgical technique, technology assessment & cost effectiveness, new technologies developments & comparison with robotics) with dedicated working groups.

Management Course | Master:

- 2011 Health Administration and Management Master, Sacro Cuore Catholic University, Milan, Italy
- 2014 Leadership & Management In NHS Course for doctors, London, UK (25th-26th November 2014)

TEACHING

I have a particular passion for teaching, and I endeavour to employ a range of teaching styles in order to suit my audience – be it medical students, junior doctors or nursing staff. I realise the importance of obtaining feedback to further develop and refine my teaching skills.

Regional:

- Senior Lecturer University of Milan, Medical School: involved in medical students teaching 2006-2014.
- Senior Lecturer University of Milan, involved in radiographers teaching and 2006-2014.
- Senior Lecturer University of Milan, Medical School, Thoracic Residency programme: involved in teaching trainees in thoracic surgery since 2009-2014
- Designated mentor and proctor for junior surgeons since 2006 (the Unit counts 7 colleagues to date)

National:

- Live surgery: invited for a live VATS lobectomy procedure (right lower lobectomy) (web streaming) during 3rd International Course on VATS and Robot-assisted Surgery in Thoracic Oncology (Milan 22nd -23rd April 2013)
- Live surgery: invited for a live VATS lobectomy procedure (right lower lobectomy) (web streaming) during International Course on VATS Mediastinal Lymphadenectomy in NSCLC (Bozen 12-13 November 2015).
- Faculty and Invited Speaker in national meetings (see list above)
- Co-developer and lead of a Master in minimally invasive thoracic surgery
- Designated Teacher at the 1st VATS Lobectomy Master on VATS Lobectomy (University of L'Aquila)

Book chapters:

- L. Spaggiari, F. Petrella and P. Solli "Thoracic wall reconstruction in local recurrences and advanced cases (Chapter 44) in: Cicero Urban & Mario Rietjens "Oncoplastic and reconstructive Breast surgery" Springer - Verlag 2013
- L. Spaggiari, D Galetta and P. Solli "Bronchovascular sleeve procedures" in: Key topics in thoracic surgery, Cambridge University Press 2015 (in press)

European:

- Faculty and Invited Speaker in international meetings (see list above)
- Live surgery: invited for a live VATS lobectomy procedure (left upper lobectomy) (satellite broadcasting and streaming) during Techno-College EACTS Annual Meeting Wien 5-9 October 2013
- Member of the COVDIEN® European Advisory Board on Minimally Invasive Surgery (MIS) and unique delegate from Italy; this working group has the aim to promote the diffusion of the VATS technique across Europe identifying an adequate training process.

RESEARCH AND INNOVATION

To date, I have published 123 peer-reviewed articles on international journals:

Calculated total Impact Factor of 341, 261 with average Impact Factor of 2,967

Overall number of citations #1561, H Index 23, i10-Index 48 (from Google Scholar 14.2.17)

My research interests include thoracic oncology, minimally invasive techniques and new technology developments. My latest innovations include:

- **A modified Pulmonary Artery clamp:** Vascular clamping during lung cancer resection may be difficult in patients with hilar or large neoplasms preventing adequate and safe exposure. In addition, the physiological vicinity of some vessels to rigid structures like the bronchi may interfere with ideal clamp positioning even in ordinary procedures. I have modified the original Blalock clamp to facilitate the control of pulmonary vessels and physiologically compress the vessel walls, thereby allowing optimal vascular resection and reconstruction during lung cancer surgery. This clamp allows easy, safe and physiological control of pulmonary vessels thanks to its double-branched guillotine mechanism. (*Interact Cardiovasc Thorac Surg.* 2012 *Modified Blalock clamp: a single-hand autostatic device for pulmonary vessel occlusion during lung cancer resection*)
- **The use of Indocyanine green to facilitate intersegmental plane identification during minimally invasive anatomic segmentectomy.** Anatomic sublobar lung segmentectomy appears to be an appropriate approach for small, early-stage lung cancer in old or frail patients or in selected subtype of cancers. During VATS however, it can be challenging to properly identify the intersegmental planes. We studied the transbronchial injection of indocyanine green during VATS procedures in order to facilitate quick and easy identification of intersegmental planes defining the target lung segment without need for lung inflation. (*J Thorac Cardiovasc Surg.* 2014 Aug;148(2):737-8)
- **Breath test for lung cancer screening.** Early diagnosis of lung cancer with screening programme is gaining popularity due to high mortality in late stages of the disease. Beside the screening programme with low dose CT scan and biomarkers (mRNA) currently on-going at IEO in Milan, I was involved in the starting project with the breath analysis (electronic nose). The procedure is non-invasive, simple and reproducible. Using sensitive methods of analysis (gas chromatography/mass spectrometry) in exhaled air of cancer patients some volatile organic compounds were discovered, possible cancer markers however not specific. We are currently studying the role of this test in screened population and its contribute in an integrated approach (CT scan, biomarkers, breath test). The project was supported by a grant of 180,000 euros for 3 years from the Fondazione Italiana per la Ricerca sul Cancro (FIRC) (*Italian Foundation For Cancer Research*).

APPENDIX 1 – CLINICAL RESUME

Current Employment

Consultant Thoracic Surgeon

AUSL Romagna (Forlì/Ravenna and Riccione) (June 2016 - present).

Role as coordinator of one of the largest catchment area in Italy with nearly 1,300,000 citizens.

The daily activity is focused mainly on treatment of oncological disease with special interest on minimally invasive surgery (VATS and Robot Da Vinci). It includes also the activity in partnership with the close Hospital of Cesena (mayor Trauma Center).

Expected volume of activity is around 900 procedures overall /year with almost 250 lobectomies per year.

Substantive Consultant Thoracic Surgeon (Apr 2015 – May 2016) and Senior clinical fellow - (Jul 2014 – March 2015)

Papworth Hospital, Cambridge UK

I left my position of Deputy Director of the largest cancer centre in Italy to gain further experience in advanced benign minimally invasive procedures and trauma surgery.

I supported my Consultant Colleagues and contributed to perform benign cases and advanced minimally invasive cases such as VATS pneumonectomies, VATS PA sleeve and single port lobectomies.

The CTSnet has recognized our work and our videos were among the top thoracic content in 2014 and 2015.

Consultant Thoracic Surgeon & Deputy-Director

European Institute of Oncology (IEO), Milan, ITALY (Jan 2006 – Jun 2014).

As a comprehensive cancer centre the clinical activity is fully focused on thoracic malignancy (lung cancer, lung metastases, mesothelioma, oesophageal cancer, chest wall tumours, mediastinal tumours). As Consultant thoracic surgeon I have performed in this hospital 1,389 procedure cases with mortality, overall rate of complications and length of hospital stay below national and international average (mortality < 1%, hospital stay 4.5 days).

My personal activity includes experience in independently performing a wide range of procedures, including:

- Surgery for lung cancer and metastases (lobectomies, bilobectomies, pneumonectomies)
- Radical Mediastinal Lymphadenectomy
- VATS for diagnosis, staging and treatment of benign and malignant thoracic tumours;
- Surgical treatment of primary and secondary chest wall tumours, including extended resection and reconstruction and including Pancoast tumours
- Surgery for oesophageal cancer;
- Surgery for mediastinal tumour;
- Lung sparing surgery (sleeve bronchial and pulmonary artery reconstructions);
- Surgery for locally advanced disease (resection and reconstruction of superior vena cava, excision of tumours infiltrating left atrium, diaphragm and chest wall);
- Surgery for mesothelioma (pleurectomy\decortication and extrapleural pneumonectomy)

Since 2010 I have been leading the introduction of a VATS lobectomy programme in the hospital. First successfully VATS lobectomy was performed in March 2010, at June 2014 more than 150 procedures have been performed, overall 30% of early stage lung

cancer are currently approached via VATS and 6 surgeons of the staff are proficient with the technique (I personally operated on 110 cases, more than 70%).

During years my responsibility increased dealing with more patients referred to the Unit and with surgical management of progressively more complex cases. I chaired periodically the weekly MDT meeting and I was currently the lead for weekly grand rounds, for journal club programme and rota coordination for the Division.

Appointed in the role of Co-Director in June 2009, my role was to oversee the operational running of the Department, annual budget setting and resources allocation.

Previous Employment

Consultant thoracic surgeon

Italian National Cancer Institute – Milan, Italy (March 2003 – December 2005)

This is the oldest and one of the largest Hospital in Italy for the cure of cancer that serves a large area in the Northern Italy, 3rd centre in the world for number of sarcoma cases referred per year. Over a period of about 3 years I was actively involved in research and educational programs, regularly assisting the Director of the Division during surgical procedures and performed a total number of 323 cases independently. I developed experience in dealing with sarcoma cases.

Consultant thoracic surgeon – PhD Student

European Institute of Oncology (IEO) – Milan (Jan 2000 – Feb 2003)

Staff thoracic surgeon

European Institute of Oncology – Milan (October 1998 – December 1999)

Specialist Registrar General Surgery (Resident equivalent)

Parma General Hospital (January 1994 – September 1998)

Basic Surgical Training

Parma General Hospital (August 1993 – December 1993)
